

Table for strip speed and hole diameter for Hole Detectors Type PP2441...

In the given hole diameter ϕ the permissible strip speed is:
 $0 \text{ m/min} \leq V_{\text{strip}} < V_{\text{max}}$; V_{max} is shown by the limit curves but must be less than this!

Comment:
 To calculate the assumed free sight path: $15 \text{ mm} + \text{hole diameter}$
 Actual free sight path: $22 \text{ mm} + \text{hole diameter}$
